

When it comes to operable walls, we're on top of the world

57'6"/17.54 m tall
Korea World Trade Center
Seoul, Korea

Hufcor is proud to announce that we have designed and manufactured a new record-breaking operable panel for the Korea World Trade Center in Seoul, Korea. While not every facility has the need for an almost 60-foot operable panel, it is accomplishments like this, along with hundreds of innovative patents, that have always set Hufcor on top of the operable wall industry throughout the world.
