

SMART USE OF SPACE

SMARTITION™ ROTATING WALLS

Hufcor, the world's leading provider of operable partitions introduces the SMARTITION™ rotating wall system – a bold new product for optimal use of interactive whiteboard technologies for education.

SMARTITION™ rotating wall systems provide Timberview Middle School in Keller, TX an efficient option for sharing classroom technology such as interactive whiteboards.

- Share expensive technology between rooms
- Uses Hufcor's patented Unispan® self-supporting system – no need for special support structure
- Installs into new or existing schools
- Provides excellent acoustical separation between rooms
- Designed with horizontal internal supports that allow schools to mount up to 300 lbs of additional equipment on the face, such as interactive projection screen equipment
- Includes pre-installed rated dual conduit for both data and electrical hookups
- Unique counter balance design makes it easy to operate

The Hufcor SMARTITION™ systems are featured in the CEFPi Classroom of the Future Project 2021.
