# Get more from your space.

Custom manufactured in the USA, Hufcor's Accordion doors are the fastest, easiest way to shape space. Also known as room dividers, accordion walls and concertina doors, accordion doors are an ideal sight and sound barrier for interiors that require frequent flexibility in space division. Available in a wide range of fabrics and acoustical ratings, Hufcor accordion doors can be custom designed and manufactured to suit the specific needs of your space.

*Hufcor Accordion doors are easy to operate, durable and come in a wide variety of options and finishes.*

*All models have an internal pantograph of 14 gauge steel for even extension, smooth operation and cover support.*

### ***THE HUF COR ADVANTAGE***

The industry's most attractive, durable accordion door is offered with the customer in mind. A selection of heavy duty aluminum track systems are available to accommodate a wide range of ceiling conditions and provide sufficient support for each door. A steel ball bearing trolley with nylon tires supports the door providing smooth, quiet operation. There is an adjustable lead carrier allowing proper alignment for effective latching at all times and enables the door to adjust to out-of-plumb conditions. Precision-engineered steel internal pantograph provides years of smooth, easy folding action and allows the door to easily maneuver curves and switches. But superior engineering does not get in the way of aesthetics. Hufcor offers wrinkle-free, impact resistant, multi-ply, semi-rigid laminated covers that provide a smooth and symmetrical appearance.
